DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, drawn to an apparatus for sorting wafers premised upon their respective status, classified in class 700, subclass 223.
 - II. Claims 9-24, drawn to a method and program for sorting and selecting a destination from the identification, classified in class 700, subclass 224.
2. Invention I is related to inventions II as apparatus and processes for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the method II may be practiced by hand and may be used to sort mail or parcel packages. In this case, the apparatus I may be used to transport and etch wafers in a wafer processing chamber.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. No claims appear to be linking claims.
